

Place your iPhone here

Front Camera

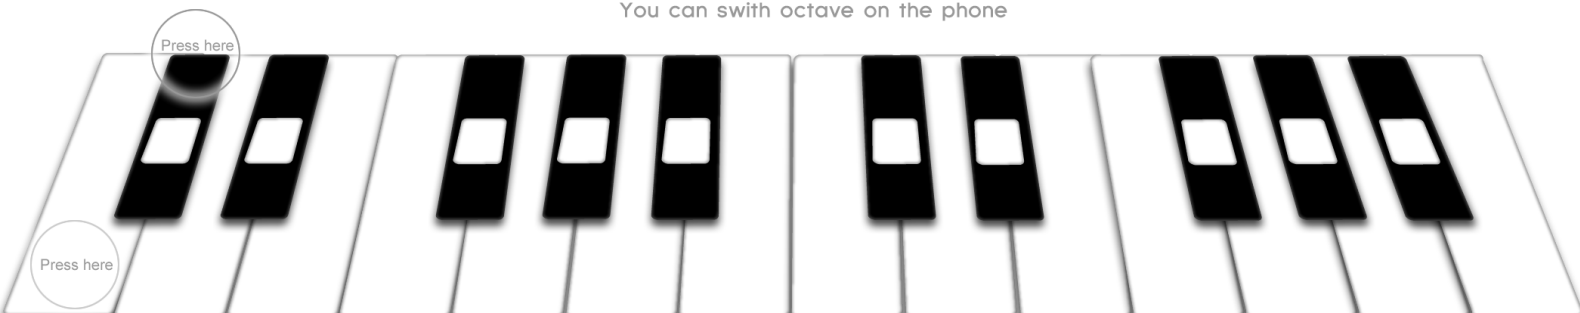

If the app does not perform well, you can place the phone 1 cm (0,4") backward, especially on letter paper!

Instructions:

- Place your phone accurately. Especially the camera must be at the marked place.
- Avoid light conditions that make strong shadows under your finger.
- If you have iPhone 6 or 6 Plus, place something (e.g.: book) behind your phone. Make sure the phone is totally vertical.
- Raise your finger 0.5 inch (1,2 cm) high after pressing a drum.
- Fold the paper at the bottom when it gives false sounds.

You can swith octave on the phone

Fold the paper here in case of bad light conditions

e.g: strong shadows, low light etc.
Help: watch the tutorial on the phone
